

McGrath Foundation Position Description

Position:	Nurse Clinical Lead – Prostate Cancer
Group:	Nursing Program
Synopsis:	Provide support to the Nursing Program Team and McGrath Cancer Care Nurses (MCCNs), including role development, clinical guidance and mentoring to support the consistent delivery of the McGrath Model of Care for people with prostate cancer.
Reports to:	Nursing Program Senior Manager
Updated:	October 2026

Required education, skills and experience:

- Registered Nurse and has registration with Nursing and Midwifery Board of Australia
- Tertiary Education qualifications in cancer nursing, ideally at Master level
- At least 5 years' recent clinical experience caring for people with prostate cancers and other tumour streams.
- Strong interpersonal skills with demonstrated leadership and people management capabilities
- Ability to develop and deliver program and education content for the Nursing Program team and MCCN cohort

Areas of responsibility:

- Provide prostate and oncology nursing expertise to the McGrath Model of Care around treatment pathways and protocols for prostate and other cancers.
- Work with the Nursing Program team to ensure consistency of information and support for MCCNs
- Provide specialist prostate knowledge to the Nursing Program team and the greater McGrath Foundation team
- Provide clinical knowledge and support (monitoring and mentoring) to MCCN's caring for people with prostate and other cancers.
- Provide insight to the Nursing Program processes and provide feedback on areas of opportunities.

Our commitment to lead from every chair:

- Take ownership and show up in a way that aligns to our values
- Empower and support our team/s so we can all deliver our best work
- Respectfully challenge and consider others' views to re-think the everyday
- Seek opportunities to keep learning and do things differently
- Be brave and share mistakes as learning experiences
- Ask for and share feedback in a way that is clear and kind
