

# Treating People Close to End of Life

NSW MNC Group

3 CPD  
Hours

5:30PM to 8:30PM  
Mon 16 March

The Mecure Port Macquarie  
The Links, Coffs Harbour

## About the session:

This dinner session will examine the complex and often emotive decisions around initiating anti-cancer treatment near the end of life, including how to balance goals of care, clinical evidence, and symptom management. We'll explore the clinical reasoning, ethical considerations, and communication strategies that guide these decisions, and discuss how clinicians can best support patients and families during these challenging moments.
